

**Properly Installed
Sump Pump**

**Digging a
trench to
extend
discharge
through yard**

Final discharge point

The City requires inspections for any of the following repairs related to storm and sanitary sewer systems:

- Installation, connections, terminations, replacement or repair of sanitary service line.
- Installation, connections, terminations, replacement or repair of footing drains.
- Installation, replacement or repair of roof drain connections.
- Installation, replacement or repair of sump pumps.

Any type of sewer work or repair that would result in discharging water or wastewater from any source to the City sanitary sewer or storm sewer collection system.
